ROK-LED300-GB

## Please read your quick start guide before use

### STEP 1: PREPARATION

- Make sure hands and nails are clean and dry. File and shape the nails as desired and push back the cuticles. Using a lint free cleansing pad, apply a small amount of Rokit Ready to clean and prepare the nails for application.

### STEP 2: POLISHING – FIRST COAT

- Shake the bottle well and apply one even thin coat of Rokit One Step Gel Polish to the nails. Remember to cap the free edge of the nail. Take care to avoid the skin and cuticle area.

**N.B.** Rokit One Step Gel Polish can be applied to both finger nails and toe nails for either a manicure or pedicure.

### STEP 3: CURING

- Cure nails under the Rokit Professional LED Curing Lamp for 1 minute. Press the black heart shaped button once to turn the lamp on. The lamp has a preset 1 minute and 2 minute timer. Press the button once for 1 minute and twice for 2 minutes. At this stage the nails only need to be cured for 1 minute. The lamp will turn off once the time is up.

**Recommended:** Apply Rokit One Step Gel Polish to four finger nails on one hand and cure. Then apply to the other four finger nails and cure. Finally apply to both thumb nails and cure together.

### STEP 4: POLISHING - SECOND COAT

- Apply a second even thin coat of Rokit One Step Gel Polish onto the nails.

### STEP 5: CURING

- Press the heart shaped button twice and cure your nails for a further 2 minutes. The lamp is preset and will turn off when the two minutes is finished.

### STEP 6: FINISHING

**Your nails are now ready to Rok!**

**N.B.** For more detailed instructions please consult page 5.

**READ ALL INSTRUCTIONS BEFORE USE.  
SAVE THESE INSTRUCTIONS FOR FUTURE REFERENCE.**

## IMPORTANT SAFEGUARDS:

**WHEN USING ELECTRICAL PRODUCTS, ESPECIALLY WHEN CHILDREN ARE PRESENT, BASIC SAFETY PRECAUTIONS SHOULD ALWAYS BE FOLLOWED, INCLUDING THE FOLLOWING:**

- ALWAYS unplug the appliance from the electrical outlet immediately after using and before cleaning. To disconnect remove plug from outlet.
- NEVER leave an appliance unattended when plugged in. Unplug from the mains outlet when not in use and before putting on or taking off parts or attachments.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children should be supervised to ensure that they do not play with the appliance.
- DO NOT reach for an appliance that has fallen in water or other liquids. Switch off at the mains and unplug it immediately. Keep dry – DO NOT operate in wet or moist conditions.
- NEVER insert pins or other metallic fasteners into the appliance.
- Use this appliance for the intended use as described in this booklet.
- NEVER operate the appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return it to the HoMedics Service Centre for examination and repair.

- Keep cord away from heated surfaces.
- Excessive use could lead to the product's excessive heating and shorter life. Should this occur, discontinue use and allow the unit to cool before operating.
- NEVER drop or insert any object into any opening.
- DO NOT operate where aerosol (spray) products are being used or where oxygen is being administered.
- DO NOT operate under a blanket or pillow. Excessive heating can occur and cause fire, electrocution or injury to persons.
- DO NOT carry this appliance by the cord or use cord as a handle.
- DO NOT use outdoors.
- This product requires 220-240 V AC power.
- DO NOT attempt to repair the appliance. There are no user serviceable parts. For service, send to a HoMedics Service Centre. All servicing of this appliance must be performed by authorised HoMedics service personnel only.
- Do not place or store appliance where it can fall or be pulled into a bath or sink. Do not place in or drop into water or other liquid.
- Failure to follow the above may result in the risk of fire or injury.
- Burns can result from improper use.
- Appliances are not to be used by:
  - persons having abnormal discoloured patches on the skin;
  - persons suffering from sunburn;
  - persons under a doctor's care for diseases that involve photosensitivity;
  - persons receiving photosensitising medications;
- The appliance must not be used if the timer is faulty
- If unexpected side effects, such as itching, occur within 48 hours of the first session of using a UV appliance, medical advice should be sought prior to further UV exposure;
  - in cases of pronounced individual sensitivity or allergic reaction to ultraviolet radiation, medical advice is recommended before starting exposure;
  - the following precautions must be taken:
    - Certain medical conditions or side effects of certain medicines may be aggravated by ultraviolet exposure. In case of doubt, seek medical advice;
    - Seek medical advice if persistent lumps or sores appear on the skin or if there are changes in pigmented moles;
- Excessive exposure to UV can be damaging to the skin. Use only for the recommended time. For extra protection apply sunscreen to any skin exposed under the lamp.
- **N.B.** Avoid applying to the nail as this will affect the application and curing of the gel polish.

## SAFETY CAUTIONS:

**PLEASE READ THIS SECTION CAREFULLY BEFORE USING THE APPLIANCE.**

- **If you have any concerns regarding your health, consult a doctor before using this appliance.**
- Individuals with pacemakers and pregnant women should consult a doctor before using this appliance.
- DO NOT use on an infant, invalid or on a sleeping or unconscious person. DO NOT use on insensitive skin or on a person with poor blood circulation.
- This product should NEVER be used by any individual suffering from any ailments that would limit the user's capacity to operate the controls.
- NEVER use directly on swollen or inflamed areas or skin eruptions.

- If you feel any discomfort whilst using this appliance, discontinue use and consult your doctor.
- Do not use for longer than the recommended time.
- If the product feels excessively hot, switch off at mains and contact the HoMedics Service Centre.
- Persons insensitive to heat must be careful when using the appliance.
-  Use your Rokit Professional LED Curing Lamp only as described. NEVER look directly at the UV lamps when they are on as Ultraviolet radiation can cause permanent injury to your eyes.

### **Cleaning**

- Cleaning shall not be done by children without supervision.
- Clean only with a soft, slightly damp sponge.
- Never allow water or any other liquids to come into contact with the appliance
- Do not immerse in any liquid to clean.
- Never use abrasive cleaners, brushes, glass / furniture polish, paint thinner etc to clean.

### **Storage**

Place the appliance in its box or in a safe, dry, cool place. Store all wet goods at room temperature and out of direct sunlight.

### **WEEE explanation**

 This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

## PRODUCT FEATURES

**Rokit Professional LED Curing Lamp** – for curing the Rokit One Step Gel Polish once applied.

**5ml Rokit One Step Gel Polish** – gel polish applied to the nails (Find us on Facebook or visit [www.rokitbeauty.com](http://www.rokitbeauty.com) to see our full colour range).

**50ml Rokit Ready** – solution used to prepare the nails for application by removing any grease or oil on the nails.

**X20 lint free cleansing pads** – used with the Rokit Ready and Rokit Remove solutions.

**Two sided nail file/buffer** – file (black section) used to file the nail into desired shape and length. Buffer (grey section) to give the nail extra shine.

**Cuticle stick** – used to push down the skin around the cuticle area. Also used to help when removing Rokit One Step Gel Polish.

**N.B.** Please check specific warnings included with the Rokit One Step Gel Polish and Rokit Ready.

## INSTRUCTIONS FOR USE

### PREPARATION

- Make sure hands and nails are clean and dry.
- File and shape the nails as desired, pushing back cuticles (file, buffer and cuticle stick provided in pack).
- Using a lint free cleansing pad, apply a small amount of Rokit Ready to the nails by wiping over the surface of the nails to clean and prepare the nails for application. This will remove any dust, oil or grease on the nails.
- **N.B.** Try not to touch the nail once this has been applied. If so, please wipe the nails again with the solution

### GEL POLISH APPLICATION & CURING - FIRST COAT

- Shake the bottle of Rokit One Step Gel Polish vigorously before use.
- Apply one even thin coat of Rokit One Step Gel Polish to the nails in a sweeping motion away from the cuticle and towards the tip of the nails until the whole nail is coated evenly. Remember to cap the free edge of the nail to prevent chipping. Take care to avoid the skin and cuticle area.
- **N.B** If the gel polish is accidentally applied to the skin around the nail, use the cuticle stick to remove before curing under the lamp.
- **N.B.** Rokit One Step Gel Polish can be applied to both finger nails and toe nails for either a manicure or pedicure.
- Place polished nails into the Rokit Professional LED Curing Lamp, with nails facing upwards. Make sure the nails are directly under the LED lights for optimal curing
- Press the heart shaped button on the lamp. The lamp has a preset 1 minute timer and will shut off when finished.
- **N.B** Do not touch the nails.
- **Recommended:** apply Rokit One Step Gel Polish to four finger nails on one hand and cure. Then apply to the other four finger nails and cure. Finally apply to both thumb nails and cure together.

### GEL POLISH APPLICATION & CURING - SECOND COAT

- Repeat the same application process as above and apply a second coat of Rokit One Step Gel Polish.
- Place polished nails for a second time into the Rokit Professional LED Curing Lamp and press the heart shaped button twice. The lamp has a preset two minute timer and will shut off when finished.
- **N.B** To achieve a rich, shiny and full look on the nails, we recommend at least 2 applications of Rokit One Step Gel Polish. Depending on the desired look and depth of the colour, further coats may be applied.
- **N.B** Rokit One Step Gel Polish can be applied to both finger nails and toe nails for either a manicure or pedicure.
- **Recommended:** apply Rokit One Step Gel Polish to four finger nails on one hand and cure. Then apply to the other four fingers and cure. Finally apply to both thumbs and cure together.

- **N.B** Make sure the gel polish bottle is kept away from the lamp throughout application. Always place the lid on tightly after use to avoid liquid drying up. This product reacts to sunlight and should not be left open and exposed. Store away from direct sunlight.

### Your nails are now ready to Rok!

### CARING FOR YOUR ROKIT NAILS

- **Recommended:** Apply a drop of Rokit Conditioning Cuticle Oil to nails once a day to help keep the natural nail, cuticle area and surrounding skin nourished and hydrated. It may also increase the wear of your Rokit nails.
- Whilst Rokit nails are long lasting, it is important that you take care of your polished nails. When using household detergents, for example, you may wish to protect your Rokit nails by wearing rubber gloves.
- **N.B.** All natural nails are unique and produce different amounts of natural oils. This may affect the longevity of your Rokit nails. If you experience bubbling or lifting of the gel polish within a day or two of curing it could have been applied too thickly. Remove the gel polish using pure acetone or Rokit Remove (available online) and re apply with thinner coats and cure following the instructions. You may also wish to experiment with a longer curing time. If you experience chipping of the gel polish within a day or two of application, it could be that the nail edge was not sealed/capped sufficiently. Repeat as above ensuring to securely cap the free edge as much as possible.

### GEL POLISH REMOVAL

- Pour a considerable amount pure acetone or Rokit Remove into a small bowl/container.
- Gently tilt to get maximum depth of the remover.
- Place nails into the remover and soak for up to 5 minutes, make sure the whole surface of the nails are covered.
- Remove nails from the remover. A large amount of the Rokit One Step Gel Polish should have peeled/soaked off.
- Gently remove the gel polish from the nail surface using the cuticle stick to assist if needed. Be careful not to damage the natural nail.
- **Recommended:** once the gel polish is completely removed, if desired apply a suitable amount of Rokit Conditioning Cuticle Oil to nourish the nail (sold separately).
